

تبارك الأكاديمية السعودية الرقمية لـ

طيف محمد الأحمد

Taif Mohammed Dakhel Alahmadi

On successfully completing **Cloud computing
Bootcamp** in a journey that lasted **13 weeks**
From **9 February 2025** to **22 May 2025**

إتمام معسكر همّة للحوسبة السحابية بنجاح بعد رحلة استمرت
لمدة **13 أسبوع** في الفترة من **10 شعبان 1446** الى **24 ذو
القعدة 1446**

Issue date **22 May 2025**

تم إصدارها بتاريخ **24 ذو القعدة 1446**

WISHING YOU A CONTINUOUS SUCCESS

مع تمنياتنا بدوام التوفيق والنجاح

Amal A. Aljuhaiman

الرئيس التنفيذي للأكاديمية السعودية الرقمية

أمل عبد الكريم الجهيمان

Cloud Computing Bootcamp | 2025

Bootcamp Plan

WEEK 0

Introduction

- Introduction to Cloud Computing
- Technical Setup
- Linux Basics
- Networking Fundamentals
- Cloud Security Basics
- Version Control Systems
- Hands-on Practice

During this time, collaboratively engage with instructors in a live online setting to understand the fundamentals of Cloud computing. Familiarize yourself with technical terminology, key concepts and the right learning mindset before your first day of the bootcamp

WEEK 1

Linux and Python Basics

- Linux
- Python
- Streamlit
- Git

Introduction to Linux environment setup, Python fundamentals, and version control with Git.

WEEK 2

SQL and Local Development

- SQL
- Python+SQL
- FastAPI
- App development

Learn SQL, integrate Python with SQL, and build local apps using FastAPI and Streamlit.

WEEK 3

Azure Fundamentals

- Azure basics
- VMs
- Vnets
- Azure CLI
- Blob storage

Introduction to Azure services, hierarchy, and deploying local apps to the cloud.

WEEK 4

Advanced Azure Networking

- Vnets
- DNS
- Load Balancer
- VMSS

Learn advanced networking in Azure and implement scalable solutions using load balancing.

WEEK 5

Infrastructure as Code

- Terraform
- ARM
- Key Vault
- CI/CD

Master Terraform and ARM templates to create and manage cloud resources.

WEEK 6

Serverless Architectures

- Function Apps
- API Management
- Monitor
- CDN

Understand serverless computing with Azure Function Apps and API Management.

WEEK 7

Containerization Basics

- Docker
- ACR
- CI/CD

Learn to containerize applications and deploy them using Azure Container Apps.

Bootcamp Plan

WEEK 8

AWS Fundamentals

- AWS IAM
- EC2
- S3
- RDS
- Lambda

Gain foundational AWS knowledge to complement Azure expertise.

WEEK 9

Advanced AWS Practices

- ECR
- ECS
- CloudFormation
- Cost management

Explore AWS containerization and infrastructure as code with CloudFormation.

WEEK 10

Capstone Project

- Final App Development

Work on end-to-end implementation of a real-world project, integrating all learned skills.

WEEK 11

Capstone Project

- Final App Development

Work on end-to-end implementation of a real-world project, integrating all learned skills.

WEEK 12

Presentation and Guidance

- Presentations
- Job guidance
- Certifications

Showcase the project and prepare for cloud engineering certifications and career readiness.
